Sacrifice and Necropsy

All test animals at the end of the observation period were sacrificed by CO₂ asphyxiation. A complete gross necropsy was conducted on the animals. See the attached necropsy report for any findings.

II. Results and Conclusion²

Dosing and mortality data are presented in Table 1. The administration of the sample by oral gavage at a dose level of 5.0 g/kg to male and female rats produced no mortality in any of the ten test subjects.

The acute oral LD₅₀ of the sample was found to be greater than 5.0 g/kg body weight.

Therefore, Mohammad HashimTajir Surma sample identified as Hashmi Kohl Aswad is not toxic by oral ingestion in accordance with FHSA/CPSC Guidelines.

² Raw data will be stored in the archives of Tox Monitor Laboratories, Inc.
